

CENTRAL INTELLIGENCE AGENCY

WASHINGTON 25, D. C.

OFFICE OF THE DIRECTOR

8 JUL 1959

Clark
Dr. Leroy E. Burney
The Surgeon General
U. S. Public Health Service
The Department of Health, Education and Welfare
Washington 25, D. C.

Dear Dr. Burney:

STAT [redacted] will shortly be returning to the Public Health Service after serving three years with the Office of Scientific Intelligence, CIA. I would like to express my appreciation to you and the Public Health Service for the services of this fine officer who has made many valuable contributions to our program.

STAT [redacted] enthusiasm, integrity, and broad professional experience contributed to his rapid adjustment to the intelligence mission, an adjustment which many professional people find difficult and frustrating. He clearly recognized the need for closer relationships between the medical intelligence community and government physicians and medical scientists responsible for U. S. health policies and research. Largely through [redacted] efforts we have established close and mutually rewarding relations with those bureaus within the Public Health Service concerned with international health and medical research. Particularly rewarding has been our association with many scientists at the National Institutes of Health, the Study Sections, and the Division of International Health. The farsightedness and wise planning of [redacted] should be directly reflected in foreign medical information more responsive to the needs of many government and private medical scientists who are becoming increasingly concerned with international health and medical research.

STAT I would again like to express my appreciation to you for [redacted] services during the past three years and to commend him for his outstanding performance. I would appreciate your advising [redacted] of this and making a copy of this letter a part of his official personnel record. STAT

Sincerely,

SIGNED

Allen W. Dulles
Director
